CSC 424 – Software Engineering II

Spring 2017

Prof. Lindy Nelson

Sprint Retrospective – Sprint 4

## Table of Contents

I. [What went well?](#)

II. [What went wrong?](#)

III. [What could improve?](#)

### **I. What went well?**

This sprint, we took our goals more seriously during sprint planning, got better at fulfilling various roles, had more specific about definitions of done, everyone was on time for both meetings, and more of the team used GitHub.

[Return to Table of Contents](#)

### **II. What went wrong?**

One of the issues this sprint was delays in passing updates between team members.

### **III. What can we improve?**

In future sprints, the team wants to get everything done by the Sunday meeting, have more frequent and specific communication regarding handing off parts of the project between team members, and make better use of GitHub.
